| 8. Reporting Yourself “not infected” | 8 |

1. Requirements of Operation

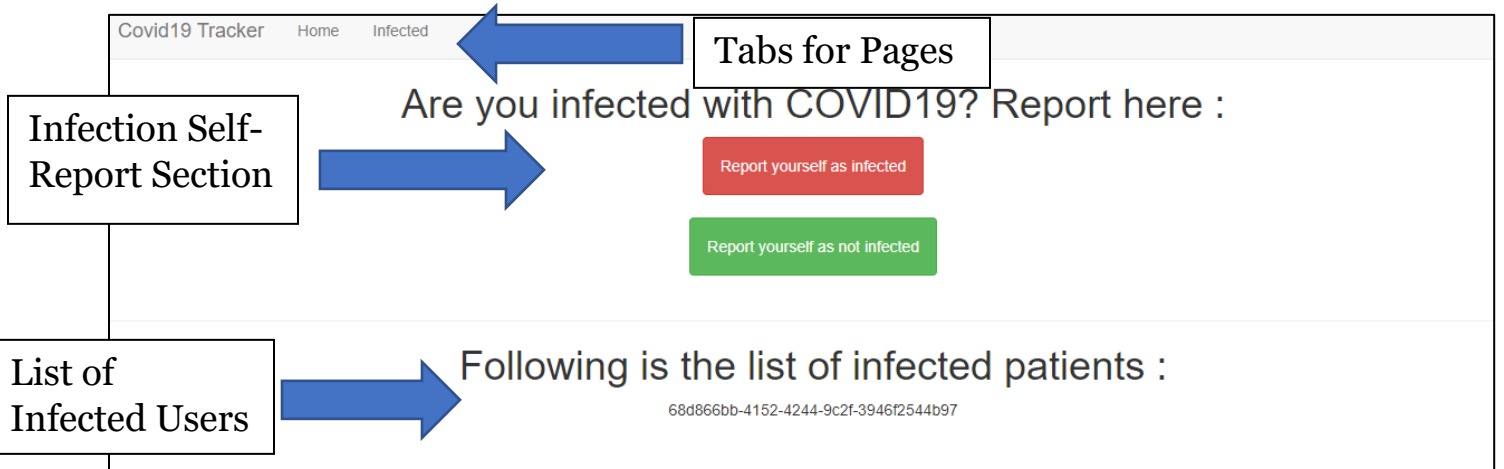

1. Have access to a device with internet access and GPS capabilities
2. Have access to Google Chrome on the device

2. Page Layouts

2.1. Home Page Layout

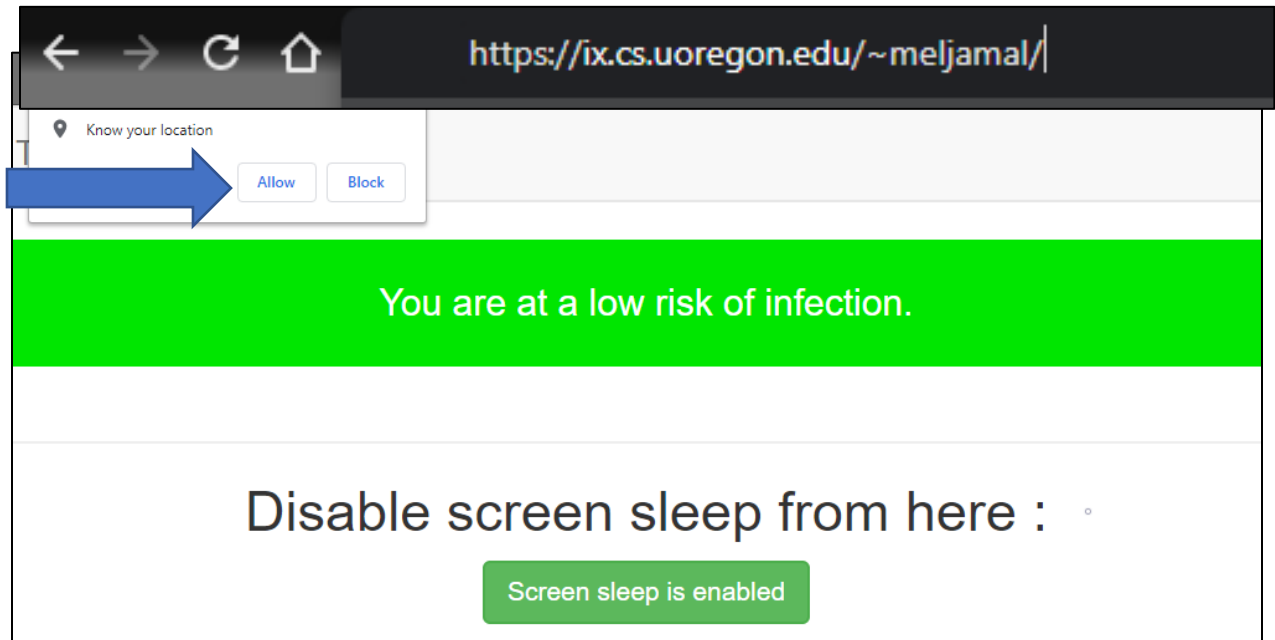

2.2. Infected Page Layout

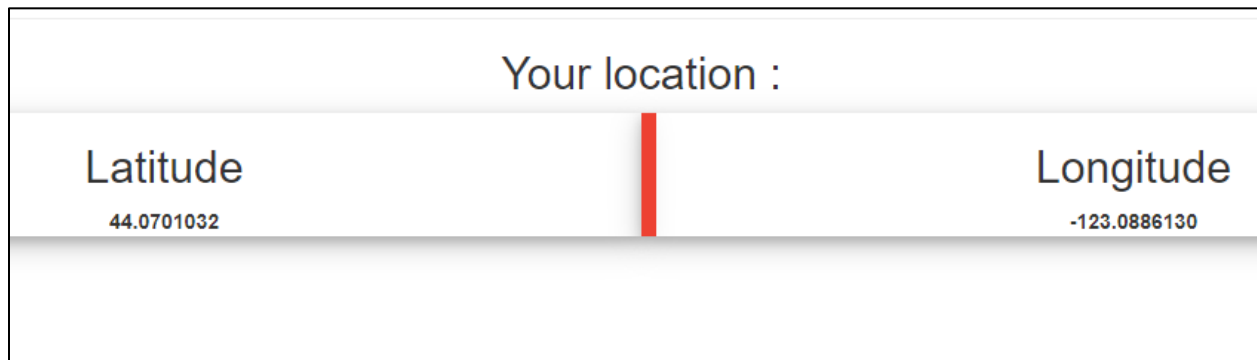

3. Start Using the System

1. Head to the hosts provided URL on Google Chrome. In our example, it is <https://ix.cs.uoregon.edu/~meljamal/> . Your site will depend on the host of the system, so make sure to ask them where you should go to.

2. Allow the site to track your location

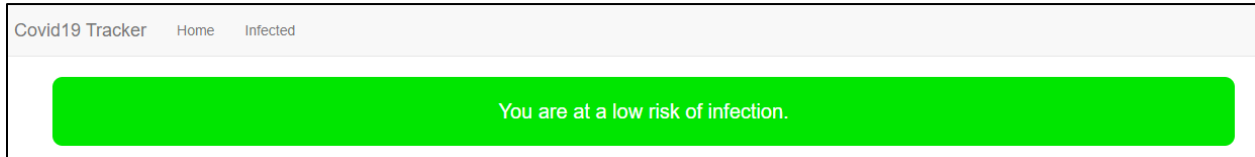

3. Your location will be displayed

4. Check Infection Risk Status

1. On the home page, check the prompt at the top of the screen

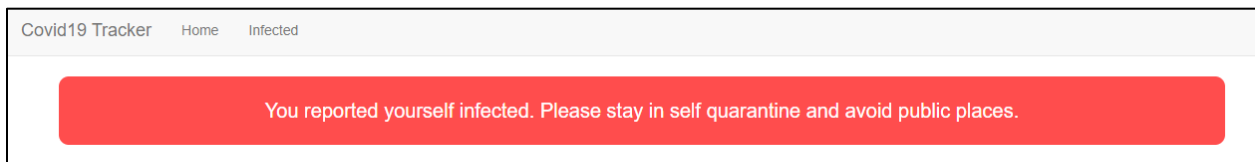

a. Low Risk

b. High Risk

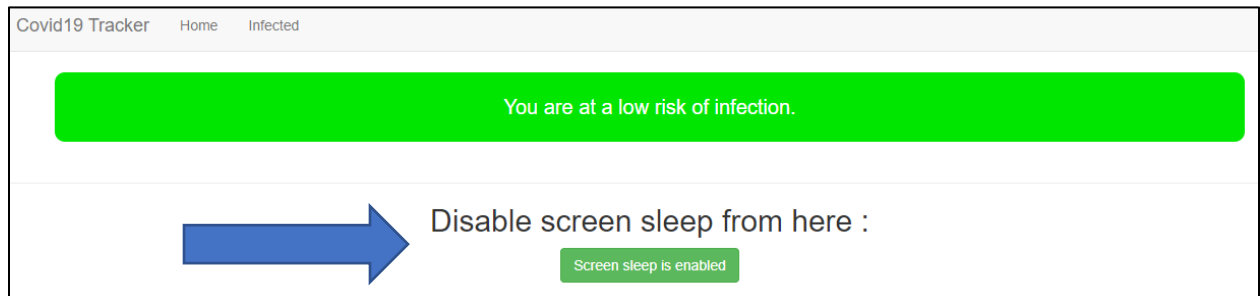

c. Infected

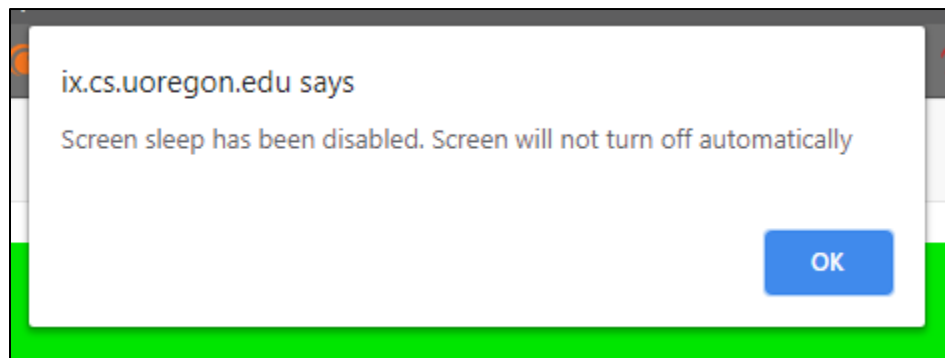

5. Disabling Sleep Functionalities

1. On the home page, click the green button labeled “Screen sleep is enabled”

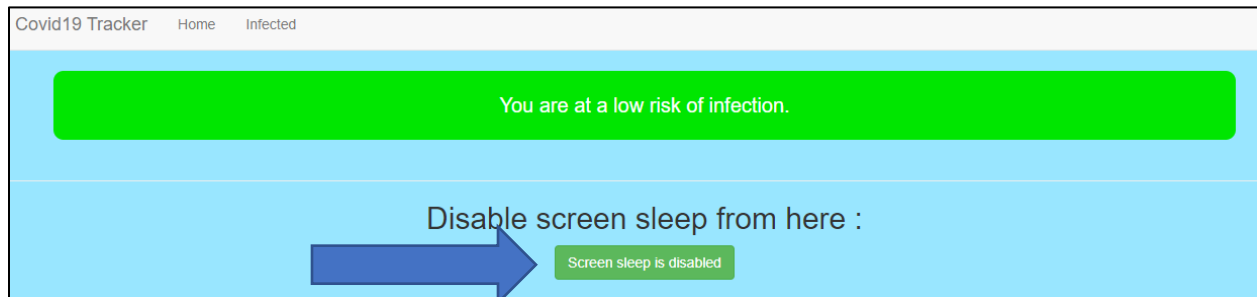

2. A prompt will inform you of the new “screen sleep” status, and your background will turn blue

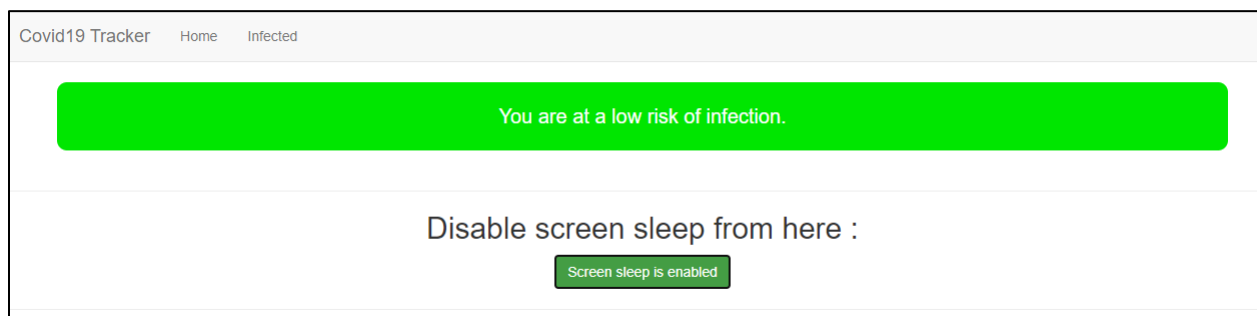

6. Returning to Default Sleep Functionalities

1. On the home page, click the green button labeled “Screen sleep is disabled”

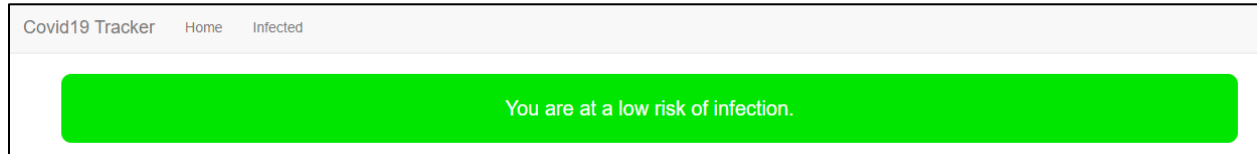

2. The background will turn white, showing successful return to normal sleep functionality

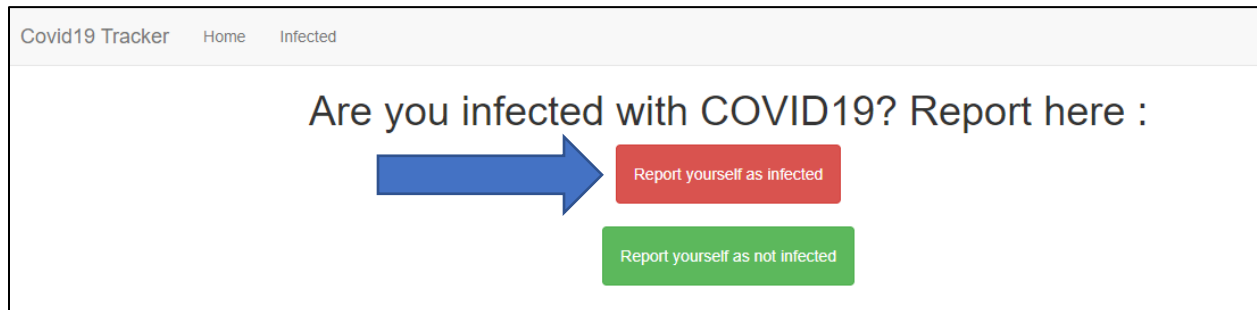

7. Reporting Yourself “infected”

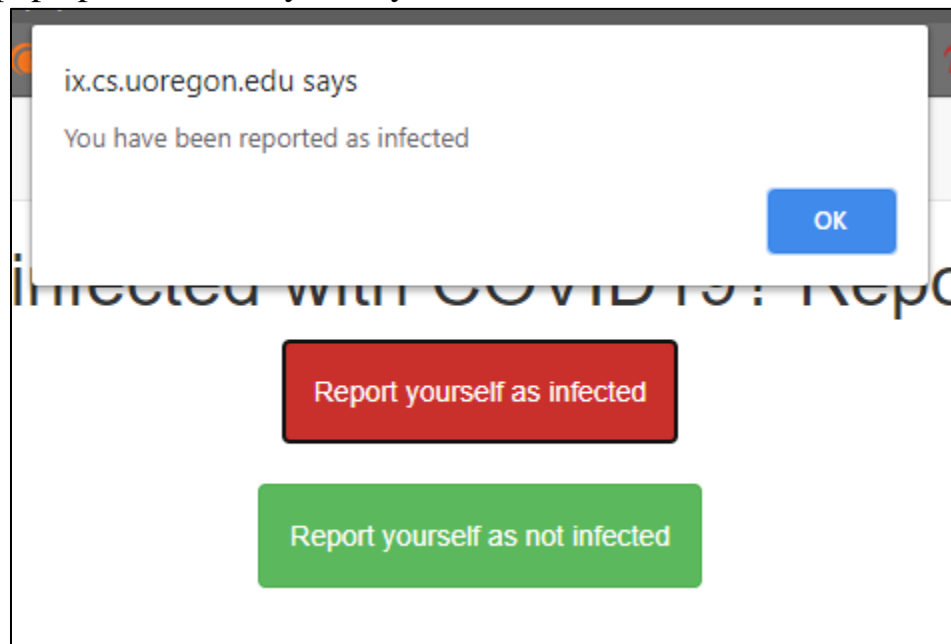

1. Click on the “Infected” tab

2. Click the red button labeled “Report yourself as infected”

3. A pop up will inform you of your new infection status

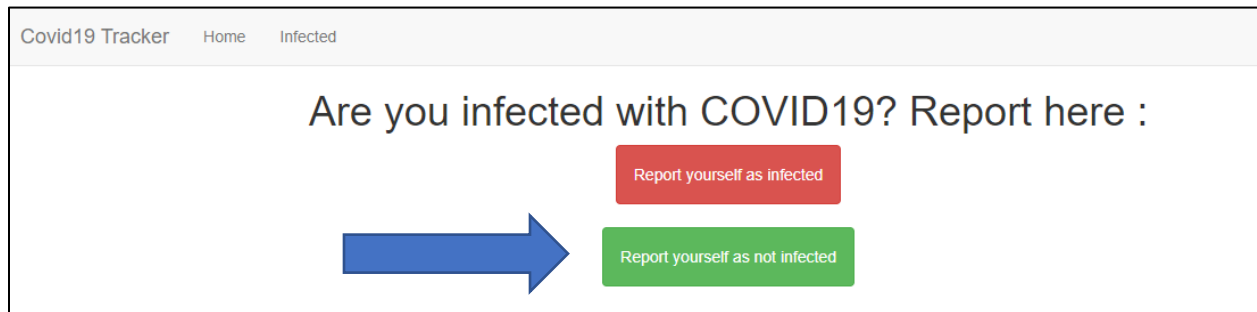

8. Reporting Yourself “not infected”

1. Click on the “Infected” tab

2. Click the green button labeled “Report yourself as not infected”

3. A pop up will inform you of your new infection status
